

Marijuana Party:

Response to Canadian Network on Corporate Accountability election questionnaire

The social facts are headed towards Canada, as a small component of Globalized Neolithic Civilization, degenerating from colonialism to *neofeudalism*. That is indicated by how public opinion polls indicate that the Liberal Party will continue to form the government after the 43rd General Elections, despite the illustrating examples of the son of a previous Prime Minister becoming a Prime Minister who could effectively order the law NOT to be enforced against one of the most corrupt corporations in the world.

The existing political economy is based on private banks creating the public money supplies out of nothing as debts, which frauds are enforced by the government of Canada, as well as almost all other governments. Big corporations grew up around those big banks being able to create the public money supplies out of nothing as debts, both in Canada, as well as almost everywhere else around the world. "*Foreign investments*" is mostly another scam, based on that underlying situation of effectively *legalized counterfeiting*. **Pretty well everything regarding the established political economy is based on ENFORCING FRAUDS.**

Political economy is quite inconceivably **crazy and corrupt to the core.**

Those already existing money/murder systems

will continue to **maximize their maliciousness!**

Due to the entrenched legal fictions, or legalized lies, that corporations are "persons," pretty well everything that is supposed to increase "human rights" tends to actually get applied to extend the powers of corporations to be above the power of governments, despite the theory that governments were supposed to have created and regulated those corporations. For instance, the last I looked, about 75% of the court cases based on the Canadian Charter of Rights and Freedoms were done to benefit corporations, as illustrated by the history of many of the most important court cases decided by the SCC having a corporation as the participant in upholding rights and freedoms (but NOT for flesh and blood human beings, but rather for those corporations.) Indeed, in my view,

many people campaigning for "human rights" fail to recognize the degree to which their paradoxical results are to grant more power to corporations, in the overall situations which amount to **runaway fascist plutocracy juggernauts turning most flesh and blood humans into road kill.**

More on that overall perspective is presented here:

NOTHING good is actually going to be done with respect to **"mandatory human rights and due diligence legislation."**

I note that the first listed Member of your umbrella organization is Above Ground, and that the **Export Development Canada** is quite understandably emphasized in particular in your third question. However, given the degree to which the international bankers, who are the best organized gangsters, *i.e., banksters, have always dominated Canada*, and continue to do so now, in ways which are automatically getting worse, faster, it seems to me to indulging in beliefs in impossible ideals to expect that big corporations and big governments based on their frauds being enforced are going to stop their trends toward almost exponentially increasing fraudulence.

The bogus "legalization" of cannabis has rapidly recapitulated the patterns everywhere else, manifesting as **more disgust class warfare**. While it used to be that the bigger political parties had deliberately set up the elections laws so that they would have ten thousand times more funding than the Marijuana Party, the newly "legalized" cannabis industry has millions of times more money than the Marijuana Party. Therefore, the Marijuana Party has become even more insignificant than previously, while everything we worked for to "legalize" marijuana has actually resulted in big governments and big corporations capturing control over cannabis, in ways which overall increase the fascist plutocracy as well as the related fascist police state powers that serve and protect that fascist plutocracy.

The *realistic* answer to your questions is **nothing.**
